

# HANZLA SAADI

## Software Engineer

Hi, I'm Hanzla. I'm a community-taught web developer at 100Devs with the background in computer science as an undergraduate. I am exceptionally passionate about coding and this passion always leads me to think about solving complex problems even while I'm eating Biryani, travelling.

- 🐙 GitHub Profile

## SKILLS

- Git/GitHub
- Figma
- Photoshop

### Frontend

- JavaScript
- CSS
- Bootstrap
- React

### Backend

- Python
- MySQL
- MongoDB

## CERTIFICATIONS

The complete JavaScript Course - Udemy

Build Responsive Real-World Websites with HTML and CSS - Udemy

The Web Developer Bootcamp 2023 - Udemy

Python for Everybody - Coursera

## PROJECTS

### Wedding Planner - 100Devs

JavaScript, Bootstrap, MongoDB, Node and Express

- I contributed to the frontend part of the project, modeled the website with Bootstrap and used logic with EJS to display data.
- This application was modelled with the MVC architecture.
  1. API, Backend: Node.js, and Express
  2. Database: MongoDB and Mongoose
  3. Frontend: EJS (templating language), Bootstrap.

### Tic Tac Toe

HTML5, CSS3 and JavaScript

- I used modules to build different parts of the app. One for the main application and other for functionality.
- I learned how to practically implement OOP concepts and use event listeners to make new **instances** to replay the app.
